DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, 17 and 25-33, drawn to inserting a tag into an email separating a first content from a first source and a second content from a second source, classified in class 709, subclass 206.
 - II. Claims 5-10 and 19-24, drawn to processing an email message to identify an original and a reply message, classified in class 379, subclass 93.24.
 - III. Claims 11 and 14-16, drawn to processing an email message to identify email content and a signature block in said email message, classified in class 704, subclass 257.
 - VI. Claims 12, 13 and 18, drawn to processing an email message to identify email content and a privacy notice in said email message, classified in class 718, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and VI are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown:
 - (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a materially different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP §

806.05(g)). In this case the products made are different from each other even though all the products are from an email.

3. The examiner has required restriction between product and process claims.

Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
